

MISATO YOSHIMOTO

Software QA Engineer | y.0113misato@gmail.com | (647) 917-7518 | [LinkedIn Profile](#) | [Personal Website](#)

SUMMARY

QA professional with hands-on experience executing 200+ test cases (functional, regression, integration, E2E) across the student-facing, admin, and institutional portals of Ontario's OSAP financial aid platform. Strong grasp of eligibility, application-status, and document workflows across OSAP funding instruments — full-time (FT), part-time (PT), and the Ontario Learn and Stay Grant (OLSG) — with sharp attention to detail and structured root cause analysis further developed through AWS enterprise cloud support. Pursuing ISTQB CTFL certification.

TECHNICAL SKILLS

- **Testing:** Functional, regression, smoke, integration, E2E, UAT; AODA/WCAG accessibility awareness (NVDA, WAVE)
- **QA tools and process:** HP ALM (defect tracking and management), traceability matrices, Microsoft Planner, Figma; Agile/Scrum SDLC
- **Programming:** Python, SQL, Java, JavaScript, HTML/CSS, C++, Git
- **Cloud and networking:** AWS (Console, CLI, CloudWatch, CloudTrail, VPC, ELB), Wireshark
- **Domain experience:** Student financial aid administration; multi-tier web applications with student-facing, admin, and institutional portals

WORK EXPERIENCE

Cloud Support Associate

Amazon Web Services Apr 2026 – Present

- Triaged and resolved high-severity networking cases (VPC, ALB, TLS, API connectivity) for global enterprise clients within 4-hour SLOs, minimizing revenue-impacting downtime for services handling worldwide production traffic.
- Applied systems thinking and first principles analysis to trace failures across interconnected AWS services (IAM, security groups, route tables, DNS, load balancers), identifying root causes that surface-level diagnosis would miss.
- Analyzed customer and AWS-side network logs (CloudWatch, CloudTrail, VPC Flow Logs) to pinpoint whether failures were isolated to a single path or system-wide, and separate customer configuration errors from platform-level defects.
- Documented reproduction steps and root cause findings for AWS engineering teams, including service-side product defects identified during validation, leading to confirmed fixes that prevented recurrence for other customers.

IT QA Assistant Co-op

MPBSDP, Ministry of Education Sep 2024 – Apr 2025

- Executed 200+ test cases across functional, regression, smoke, integration, and E2E testing for Ontario's student financial aid platform (400k+ users per academic year), covering the student-facing, admin, and institutional portals.
- Identified and triaged 50+ defects in HP ALM with severity classification, reproduction steps, and expected-vs-actual documentation; completed confirmation and regression testing after fixes, and maintained traceability matrices to support UAT and release sign-off.
- Served as primary co-op QA resource for the Ontario Learn and Stay Grant module, working directly with the tech lead and consultants and testing complex eligibility scenarios including student withdrawal, employment registration, and six-month compliance deadlines.
- Supported fellow co-op students in test execution by explaining system functionality and business rules across the student financial aid domain, serving as an informal knowledge resource for the team.
- Developed net-new test cases from business requirements and Figma design flows; created testing documentation to help future team members understand the system and testing approach.
- Validated cross-portal data consistency by verifying that student-facing application behavior correctly reflected admin-side updates to restrictions, required documents, and application status.
- Supported institutional program maintenance including academic-year rollover testing and approval workflow queue validation.

EDUCATION

Diploma – Computer Programming

Seneca Polytechnic May 2023 – Aug 2025

- President's Honour List (GPA 4.0)
- Relevant coursework: Software Testing, Database Management, Object-Oriented Programming, Web Development, Data Structures and Algorithms

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (2026)
- AWS Certified Cloud Practitioner (2025)
- Selenium Essential Training – LinkedIn Learning (2024)
- ISTQB Certified Tester Foundation Level (CTFL) v4.0 – In progress
